RE: 646.9410

Hi Mel/Mario,

I think that the best scenario here is as follows:

- 1. Sales Account Manager advise our customer that:
 - The kits are shipping as planned.
 - Shipment will be partial as shims are missing from the kits.
 - We intend to complete their kits by providing them with the shims in about 4-5 weeks, once we have them in stock.
 - If they are installing the kits within the next 3-4 weeks and do need the shims, DART Tech Support ON/CA can fully support them with the installation.
- 2. Ship the kits tomorrow as planned (unless the SAM gets back to us stating we can ship the kits at a later date).

Hope this helps.

Marc

Subject: 646.9410

Hi,

It's a 4-5 week lead time for the shims. From the previous emails with Alain Madore and Steve, the quickest fix to not lose sales would be to ship without and put a note is sales to advise the customers...what are your thoughts? We have three shipping tomorrow

Thanks

Melanie
